About Me

Full-Stack Software Engineer with 3+ years of experience, seeking long-term opportunities in a global environment. Highly excited to solve problems and work on real-world products used by end users every day.

Work Experience

Phalanx Services - Full Stack Developer   3/2024 - Present

- **Web Development:** Developed and maintained 20+ web applications, including the company website, financial dashboards, and a Google Sheets reporting tool to streamline internal workflows.
- **Automation & Bots:** Engineered a centralized web app to manage company bots, Slack integrations, and browser automation scripts that simulate user behavior.
- **DevOps & Infrastructure:** Managed Nginx configurations, developed automation shell scripts, and implemented Google Calendar solutions to support company-wide meeting scheduling and coordination.
- **Collaboration:** Worked cross-functionally to identify problems and implement automation solutions.

Simpson Strong-Tie Việt Nam - Full Stack Web Developer Intern   8/2023 - 11/2023

- **Frontend Development:** Built responsive E-commerce and portfolio applications using Ant Design and MUI based on self-designed Figma prototypes, focusing on reusable components and GitHub peer reviews.
- **Agile Collaboration:** Worked within an Agile Scrum framework to track sprint goals and deliver technical presentations on project progress.

Hahalolo - Full Stack Web Developer Intern   7/2022 - 10/2022

- **Frontend Development:** Built and structured web applications using HTML, CSS, and components.
- **Standards:** Maintained code quality, project structure, and development best practices.

Project

Karaoke Management System - Full Stack Role

- Enables multi-room karaoke billing with item and time tracking, automatic charge calculation, bill printing, and admin revenue and item management.

Poppay System - Full Stack Role

- Developed a coffee POS system supporting customer self-ordering, staff order processing, bill printing, shift management, and admin control of items, reports, employee hours, and real-time multi-location operations.
